DETAILED ACTION

This Office Action is responsive to the applicants' RCE filed on Nov. 21, 20016.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Nov. 21, 2006 has been entered. In this amendment, claims 1 and 13 have been amended. Accordingly, claims 1-24 are pending in this application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3748

2. Claims 1-6 and 13-18 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3, 8-11 and 18 of U.S. Patent No. 7,101,160. Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims are merely broader in scope than those of the patent. Therefore, the patent claims anticipate the application claims. Following the rationale in *In re Goodman* cited in the preceding paragraph, where applicant has once been granted a patent containing a claim for the specific or narrower invention, applicant may not then obtain a second patent with a claim for the generic or broader invention without first submitting an appropriate terminal disclaimer. Note that since Application claims 1 and 13 are anticipated by Patent claims 1, 2 and 18 and since anticipation is the epitome of obviousness, then Application claims 1 and 13 are obvious over Patent claims 1, 2 and 18.

Claims 7-12 and 19-24 are rejected by virtue of their dependence on claims 1 and 13.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of one patent: Kimura et al. (U.S. Patent Number 6,872,063) discloses the elastic member urging the movable scroll member toward the fixed scroll member and having a motor chamber being interconnected with the suction passage through the hole.
